

1

Solve the fraction addition problem.

4.NF.3

2

Solve the fraction subtraction problem.

4.NF.3

3

Solve the fraction subtraction problem.

4.NF.3

4

Solve the fraction addition problem.

4.NF.3

5

Solve the fraction addition problem.

$$\frac{1}{3} + \frac{1}{3} =$$

4.NF.3

6

Solve the fraction subtraction problem.

$$\frac{8}{9} - \frac{3}{9} =$$

4.NF.3

7

Solve the fraction subtraction problem.

$$\frac{4}{5} - \frac{2}{5} =$$

4.NF.3

8

Solve the fraction addition problem.

$$\frac{1}{6} + \frac{3}{6} =$$

4.NF.3

**9** Write and draw two ways to decompose this fraction:

$$\frac{3}{4}$$

**4.NF.3**

**10** Write and draw two ways to decompose this fraction:

$$\frac{5}{6}$$

**4.NF.3**

**11** Write and draw two ways to decompose this fraction:

$$\frac{4}{7}$$

**4.NF.3**

**12** Write and draw two ways to decompose this fraction:

$$\frac{3}{8}$$

**4.NF.3**

**13**

Solve the fraction addition problem.

$$2\frac{1}{4} + 1\frac{3}{4} =$$

4.NF.3

**14**

Solve the fraction subtraction problem.

$$3\frac{4}{5} - 1\frac{3}{5} =$$

4.NF.3

**15**

Solve the fraction subtraction problem.

$$4\frac{1}{6} - 2\frac{5}{6} =$$

4.NF.3

**16**

Solve the fraction addition problem.

$$1\frac{5}{8} + 1\frac{7}{8} =$$

4.NF.3

**17**

Abby ate  $\frac{3}{5}$  of the pie, and Annie ate  $\frac{1}{5}$  of the pie. How much pie did they eat altogether?

**4.NF.3**

**18**

Brian opened a new gallon of milk. He drank  $\frac{2}{7}$  of the gallon of milk. What fraction of the gallon remains?

**4.NF.3**

**19**

Micah jumped  $\frac{2}{3}$  of a yard, and Josiah jumped  $\frac{2}{3}$  of a yard. How far did they jump altogether?

**4.NF.3**

**20**

Lindsey ran  $\frac{7}{8}$  of a mile, and Janet ran  $\frac{3}{8}$  of a mile. How much farther did Lindsey run than Janet?

**4.NF.3**
