1

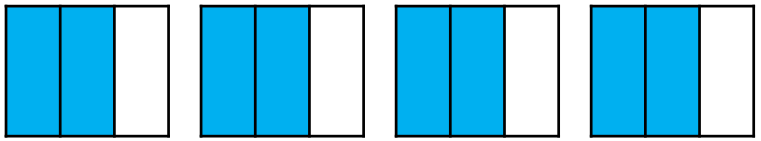
Which expression matches the visual model?

A) $\frac{1}{3} \times 6 =$ B) $\frac{1}{2} \times 6 =$

4.NF.4

2

Which expression matches the visual model?



A) $4 \times \frac{2}{3} =$ B) $5 \times \frac{2}{3} =$

4.NF.4

3

Draw a visual model to solve.

$$3 \times \frac{5}{8} =$$

4.NF.4

4

Draw a visual model to solve.

$$\frac{1}{5} \times 2 =$$

4.NF.4

5

Multiply to solve.

$$\frac{6}{7} \times 3 =$$

4.NF.4

6

Multiply to solve.

$$5 \times \frac{4}{6} =$$

4.NF.4

7

Multiply to solve.

$$2 \times \frac{1}{7} =$$

4.NF.4

8

Multiply to solve.

$$\frac{1}{3} \times 8 =$$

4.NF.4

9

Multiply to solve.

$$\frac{3}{8} \times 4 =$$

4.NF.4

10

Multiply to solve.

$$6 \times \frac{1}{4} =$$

4.NF.4

11

Multiply to solve.

$$3 \times \frac{2}{5} =$$

4.NF.4

12

Multiply to solve.

$$\frac{1}{6} \times 5 =$$

4.NF.4

13

Multiply to solve.

$$\frac{1}{2} \times 9 =$$

4.NF.4

14

Multiply to solve.

$$5 \times \frac{4}{5} =$$

4.NF.4

15

Multiply to solve.

$$7 \times \frac{2}{7} =$$

4.NF.4

16

Multiply to solve.

$$\frac{1}{8} \times 3 =$$

4.NF.4

17

Charlotte ran 5 miles on Friday, and on Saturday she ran 2/5 as far as she did on Friday. How far did she run on Saturday?

4.NF.4

18

At the candy store, 6 friends each bought 1/3 of a pound of candy. How many pounds of candy did they buy altogether?

4.NF.4

19

A doughnut recipe called for 7 cups of flour. If someone wanted to make 1/2 of the doughnut recipe, how many cups of flour would they use?

4.NF.4

20

On Wednesday it rained 4 inches. Then, on Thursday it rained 2/3 as much as it did on Wednesday. How much did it rain on Thursday?

4.NF.4
